### PROJECTS

#### Portfolio Website

- Check out my portfolio website showcasing projects built using **HTML**, **CSS**, and **JavaScript**.
- [GitHub Repository](#)

#### Invoice Generator

- Developed a **responsive** web-based application using **React JS** and **Firebase** to create and manage invoices **dynamically**.
- Implemented features such as dynamic form fields for **adding/removing** invoice items, customizable invoice templates, and **PDF** generation for exporting invoices.
- Sole developer responsible for the design, **front-end development**, and integration with back-end services.
- To implement **notifications**, I have used **Toastify**.
- [GitHub Repository](#)

#### Add User

- Developed a Redux middleware API project to demonstrate integration with backend APIs using React and Redux Toolkit.
- [GitHub Repository](#)

#### TrueBust

- TruBust Analytics Dashboard is a data visualization project built to provide **real-time analytics** Implemented interactive **charts and graphs**.
- Used: ReactJS, RESTful APIs.
